EDUCATION

Silver Oak University

Sep 2021 - Oct 2025

Bachelor's Degree in Information Technology Engineering ; **CGPA :9.24**

Sahajanand Vidhyalay

March 2020

12th HSC,GSEB Borad ; 92 %

EXPIREENCE

Teachnook Cyber Security Internship

Jun 2023 -Aug 2023

- I was completed the Cyber Security course from TEACHNOOK.This internship duration is 3 month and I learn basic concept of phishing attack,malware and how to protect out mobile and laptop.

Internship CoderGenix Solutions in Web Development

Aug 2023 - Oct 2023

- During my summer internship ,I gained hand -on experience with the react js library, learn how to create dynamic website using components,state and props concept.
- I have also created a sample website to use this concept

Internship Chinmay Finance Limited

- I completed a 3-month internship at Chinmay Finance Limited, working with Node.js, NestJS, and ExpressJS. I developed backend solutions, optimized APIs, and gained hands-on experience in server-side development.

SKILLS SUMMARY

- **Languages:** HTML,CSS, JavaScript,Node.JS,Nest.JS, Express.JS, PostgressSQL, React.JS
- **Soft Skills:** Sharp learner ,Analytical Thinking, Time Management
- **Tech Stack:** Bootstrap, Sequelize.

PROJECTS

Invoice and financial balance report

- When any client logs into this website, he has to fill the basic details, then if the client wants to add any invoice, he can do it and a report of all these invoices is generated which is for 1 month and this All data shows in financial and report balances.
- this website was created using languages like html,css,bootstrap and javascript.

weather web

- Creating a weather forecast application that allows users to search for any city and displays accurate, real-time information on temperature, humidity, and rainfall. The challenge involves integrating an external weather API, ensuring responsiveness and user-friendly design across different devices, and managing potential errors such as incorrect city names or network issues.

Selfies API

- I developed an Express.js API for uploading selfies, enabling users to securely upload images. The selfies are stored in a PostgreSQL database, ensuring efficient and organized image management.

Loan API

- This mini project involves creating an API to filter and manage user loan data stored in a database. The data includes user ID, loan ID, name, email, principal rate, loan amount, disbursement date, loan status, and closing date. Users can filter the data based on a specific date, month, or year, retrieving the relevant loan information. Once the data is filtered according to the user's requirements, it is exported to an Excel file. The API supports querying and downloading data in Excel format for user convenience.

CERTIFICATES

Html,Css,Javacript

- I earned a web Web Development certificate from codergenix, which strengthened my skills in using create a web site for html,css and js.

Backend Developer

- Completed a 3-month internship at Chinmay Finance Limited, gaining hands-on experience in backend development with Node.js, Express.js, and Nest.JS. Contributed to API development, database integration, and server-side solutions.
